YOUR SPECIALIST PRACTICE
FOR CHILD AND
ADOLESCENT PSYCHIATRY
& PSYCHOTHERAPY

Berlin

WE SUPPORT YOU

The development of children and adolescents is a dynamic process. It can be challenging at times and sometimes also overwhelming for those involved.

We first discuss the current situation in a personal meeting. Together we develop an individual and needs-based treatment plan.

If you wish, we work in an interdisciplinary manner and cooperate with the respective schools, institutions, authorities, therapists and other specialists.

OUR TEAM

We are a team with years of clinical experience. We work with a team of medical specialists, psychologists and social workers.

We are very familiar with the care and support system in Berlin and Brandenburg.

We offer children, adolescents and their families a comprehensive and holistic treatment concept within the framework of the social psychiatric agreement.
